To choose the right bed

The better comfort level you choose, the more resilience, support and pressure relief the bed will provide.

If you prefer to sleep on your side, it is important that your spine is as straight as possible. The softer shoulder zone must help the shoulder to get down into the mattress. The hip zone needs to be firmer to give the correct support for your hips. With Wonderland's adjustable hip zone, you can change the firmness to adjust the position of your hips. When your spine is straight, you will get better relaxation, recovery and sleep quality.

Norwegian design and quality

Wonderland's beds are produced in Åndalsnes, in Norway. We focus on understanding the human need for sleep and what the body needs to recover well. Wonderland wants to contribute to a world that sleeps better.
